

# Executive Research Report

■■ Execution Notice: Execution notice: RetryError[]

## Gathered Research Findings

**Step 1: Search long-term memory for any previously stored NVIDIA FY2024 revenue, Data Center segment growth, and R&D capex information to avoid redundant external calls.**

[Summary]: No previously stored NVIDIA FY2024 revenue, Data Center segment growth, or R&D capex information found in long-term memory.

**Step 2: Retrieve NVIDIA's basic company overview, sector, industry, market cap, and current stock price.**

"ticker": "NVDA",  
"name": "NVIDIA Corporation",  
"exchange": "NASDAQ",  
"sector": "Technology",  
"industry": "Semiconductors",  
"country": "US",  
"website": "https://www.nvidia.com",  
"description": "NVIDIA Corporation stands as a prominent provider of advanced graphics, computational, and networking solutions, operating across the United States, Taiwan, China, and numerous international markets. Its Graphics division encompasses GeForce GPUs, central to PC gaming and personal computing experiences, along with the GeForce NOW cloud gaming service and its supporting infrastructure, as well as dedicated solutions for various gaming platforms. For professional visualization, it provides Quadro and NVIDIA RTX GPUs for enterprise workstations, further offering vGPU software designed for cloud-centric visual and virtual computing, automotive platforms for in-vehicle infotainment, and the Omniverse software suite, facilitating 3D design and virtual world creation. The Compute & Networking segment is a cornerstone for AI, high-performance computing (HPC), and accelerated data center platforms. It integrates Mellanox networking and interconnect solutions, delivers automotive AI Cockpit technologies, fosters autonomous driving development through strategic agreements, and offers comprehensive autonomous vehicle solutions. This segment also manufactures cryptocurrency mining processors, supplies Jetson platforms for robotics and other embedded applications, and offers enterp
